

## RINGS SIZE GUIDE

To set your ring size, we recommend that you follow the steps and instructions below.

The measurement of the finger has variations throughout the day: thinner in the morning, or when it is cold. Therefore, in order to get the correct measurement, we recommend that you take the measurement at the end of the day, or when the finger is warm. To do this, use the table below and the sizes guide.

Do the measurement several times using these instructions. Do not use other methods because they may distort the result.
